**Tips:**

**\*Before uploading thousands of articles, it is best to upload a small zip file containing 10-20 articles first to see how this plugin works.**

**\*It is ideal to upload certain niche articles for a certain category at a time.**

**\*Depending on your server specs, publishing 10,000 articles may take a few hours up to a day or more.**

**\*Use article spinning tool to make your articles unique. See my recommendations below.**

Thank you.
