A project can manage multiple biolink pages and shorted links.

*h* Name

**Create**

After you have set up your account you need to create a new project start by entering the name of your project.

## Madsense Revamped Project :

[Back to Projects List](#)

All the links created in this project.

### Project Links

[+ Create](#)

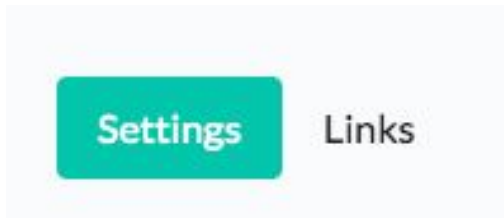

There are no links for this project, why not create one? 🔥

After you have set up your project just click on the project you created and it will take you to the next step where you can start creating your links.

The screenshot shows the 'Links' creation interface. At the top, there are tabs for 'Settings' and 'Links', and a green '+ Create' button. The main form contains the following fields and options:

- Short Url:** A text input field containing 'http://easyinstalinks.com/app/ madsense'. Below it, a note says 'Leave empty for a random generated one.'
- Image:** A camera icon with a dashed circle around it, indicating an image upload area.
- H Title:** A text input field containing 'Madsense Revamped'.
- Description:** A text input field containing 'How Complete Newbies Turn A \$5 Budget Into THOUSANDS Per Month W'.
- Text Color:** A color selection bar.
- Background Type:** A dropdown menu set to 'Preset', with five color swatches below it: purple-to-blue gradient, orange-to-red gradient, green-to-blue gradient, pink, and blue.
- Display Branding:** A toggle switch that is currently turned on.
- Branding Name:** A text input field. Below it, a note says 'Leave empty to have the default site branding.'
- Branding URL:** A text input field containing 'https://www.youtube.com/watch?v=ixaMdtOIBRE&t=38s2'.

Start by creating a name for your project once you have created a name you can start to Create your link. Once inside give the link a name,description you can also change the background image of your phone where your links will be stored. Once this is done you can go further in depth and start adding your google pixels and facebook pixels.

Once you have done all this at the top of the page you will see a button that says links just click on this then you can start adding your links.

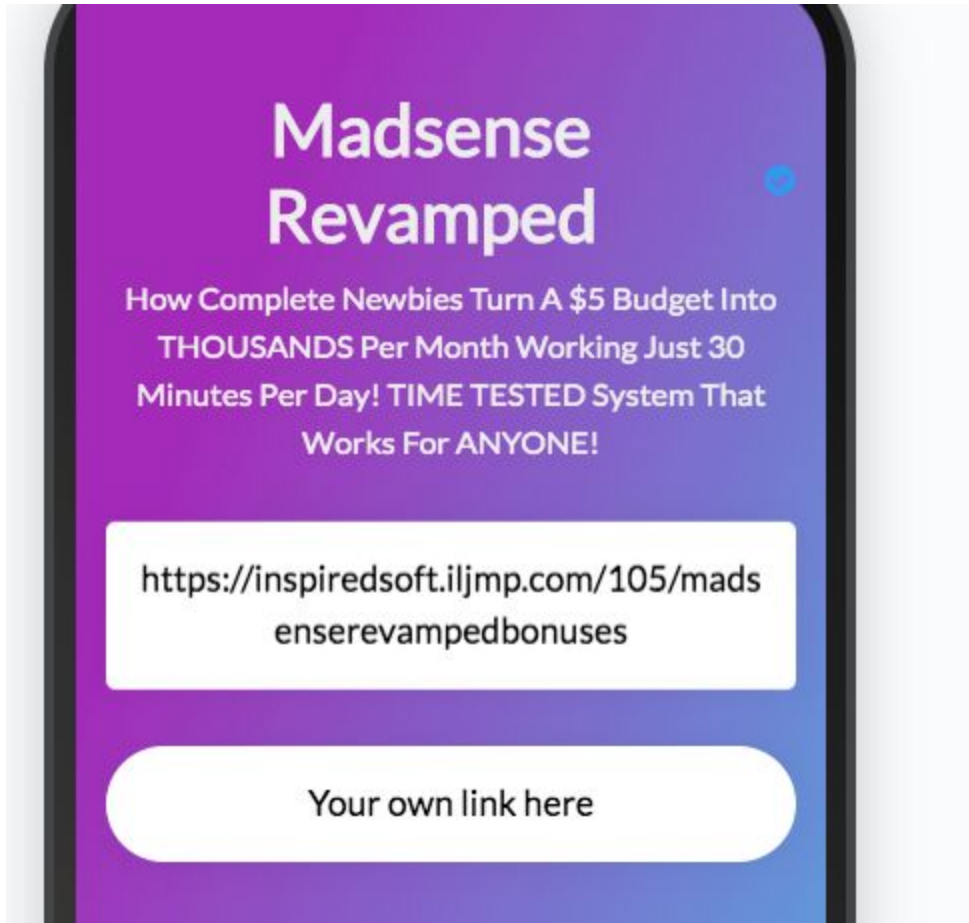

The next step you need to click create and add the url you are wanting to use then click edit on the link you have just created.

The screenshot shows a settings interface for a link. At the top, the link ID is 'nM8uodDoQd' and the destination URL is 'https://www.latherup.co.uk/'. A dropdown menu is open, showing options: 'Edit', 'Statistics', 'Switch Status', and 'Delete'. The 'Settings' section includes:

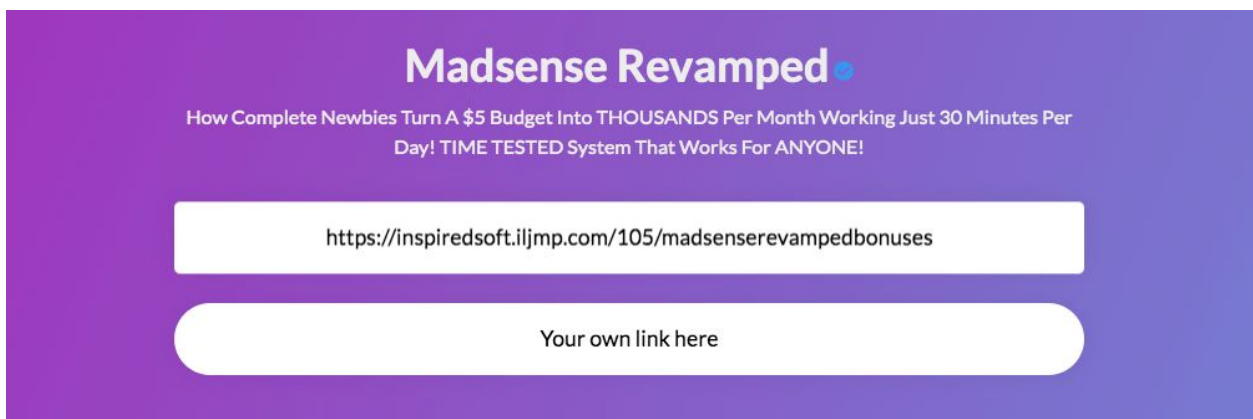

- Destination Url:** A text input field containing 'https://www.latherup.co.uk/'.
- Short Url:** A text input field containing 'http://easyinstalinks.com/app/' followed by a dropdown menu showing 'nM8uodDoQd'. Below it, a note says 'Leave empty for a random generated one.'
- Schedule:** A toggle switch is turned off. Below it, text says 'Set an exact date when the link will work.'
- Name:** A text input field containing 'Your own link here'.
- Icon:** A dropdown menu showing 'ex: fab fa-instagram'. Below it, text says 'FontAwesome icon class. Leave empty for no icon.'
- Text Color:** A color picker showing a solid black color.
- Background Color:** A color picker showing a white color.
- Outline:** A toggle switch is turned off.
- Border Radius:** A dropdown menu showing 'Rounded'.
- Animation:** A dropdown menu showing '-'.

At the bottom center, there is a teal 'Update' button.

Once you have clicked edit you need to start by putting your destination Url in. After you have done this you can start changing the colour to what you prefer you can make the link bounce,wobble and much more to catch the eye of your customer

Then once you have made all your changes just click update and you will see your link set out like this.

Then add this link to your Instagram account and when your customers, followers click on your bio link they will be taken to a page like this where you can have numerous links.
